PROJECTS

- **Human Face Blurring on Static Images** July 2024
 - Developed an image processing project for implementing face blur in static images for enhancing privacy protection in images. The project includes a GUI that allows users to load and process face blur on an image, and save the modified changes. Additionally, the project allows for selective blurring of faces, enabling precise control over which faces are obscured in the images. This tool offers an effective way to obscure faces while providing an intuitive interface for managing image processing tasks.
